

TÂN HỒNG PHONG

SUMMARY

I am a Logistics Technology student at UEH with a strong interest in logistics operations, planning, and supply chain technology. My goal is to build a career in S&OP, Planning, or logistics functions by combining operational thinking, analytical problem-solving, and practical applications of AI and supply chain technology.

CONTACT

Address: 2225 Pham The Hien, Ho Chi Minh City, Vietnam

SKILLS

Technical skills:

- Excel & Power BI basics.
- Python, SQL query, CPLEX.
- Machine Learning & Deep Learning.
- LLMs Agents.
- Web development.

Soft skills:

- Teamwork
- Research
- Project management
- Leadership
- Presentation

EDUCATION HISTORY

Bachelor of Engineering

2024 – Present

University of Economics Ho Chi Minh City (UEH)

- Major in Logistics Technology. GPA: 3.87
- Career Focus: Logistics Operations, Systems Analysis, and Supply Chain Technology.

Standing Member OpenLAB

2024 - 2025

OpenLab - 3I – UEH

Researched and operated Mobile Robot systems in real-world settings.

Engineering Exchange Program

02/2025 - 06/2025

National United University - Miaoli, Taiwan

Academic Affairs Member - CTD, UEH

12/2025 - Now

Researched and developed optimization models for logistics problems.
Supported learning activities for CTD.

Selected Achievements:

- Second Prize – UEH Young Researcher Award 2024–2025
- Second Prize – Robot Challenge 2025
- Second Prize – CTD Scholars Student Awards 2025.

PROJECTS

► Research on Bird's Nest House Monitoring Robot System

- Researched and designed a monitoring system for indoor bird's nest houses
- Developed a solution for environmental supervision in practical settings

► Autonomous Picking Robot with Computer Vision

- Designed an automated picking robot inspired by smart factory applications
- Integrated computer vision to support object detection and picking operations

► AI, IoT for Blockchain in Food Supply Chain Transparency

- Researched the application of AI, IoT for blockchain in clean food SC.
- Proposed a transparency verification approach to improve traceability and trust.
